

leveldb::log::LogTest
::CheckOffsetPastEndReturns
NoRecords

leveldb::log::LogTest
::CheckInitialOffsetRecord

leveldb::log::LogTest
::WriteInitialOffsetLog

```
graph LR; A["leveldb::log::LogTest  
::CheckOffsetPastEndReturns  
NoRecords"] --> C["leveldb::log::LogTest  
::WriteInitialOffsetLog"]; B["leveldb::log::LogTest  
::CheckInitialOffsetRecord"] --> C;
```

The diagram illustrates a relationship between three methods in the `leveldb::log::LogTest` namespace. Two methods on the left, `::CheckOffsetPastEndReturnsNoRecords` and `::CheckInitialOffsetRecord`, are shown in white boxes. Blue arrows point from each of these methods to a third method on the right, `::WriteInitialOffsetLog`, which is shown in a gray box. This suggests that both test methods rely on or interact with the `WriteInitialOffsetLog` method.
